Education

Indian Institute of technology Bombay 2017-2021
Bachelor of Technology in Computer Science and Engineering
With Honors

Professional Experience

VMware - Member of Technical Staff 2 July 2021 - Present
CarbonBlack Windows Sensor Pune

- **CIS Benchmarking**
 - Conceptualized and implemented compliance management module for automated scalable hardening and remediation of security configurations across various windows OSes and profiles based on **OVAL** rules
 - Designed efficient formats for CIS Benchmarks running **1000 times** faster than CIS -CAT pro
- **CarbonBlack XDR**
 - Aided kernel integration of LastLine IDS engine and solidified with extensive kernel mode tests
 - Developed an **usermode** pcap replay tool for windows independent of any kernel mode packet capture libraries
- **Host Based Firewall**
 - Developed a PoC for automated migration of on-device windows firewall rules to CarbonBlack backend
- **Cloud Workload Protection**
 - Worked with **VDI** to implement automatic sensor re-registration for cloned VMs on Azure
 - Worked on developing sensor installation scripts using launch scripts on **GCP and Azure**
- **Team Development**
 - Organized an internal Capture the Flag event for enhancing internal security practices at Pune office
 - Automated development machine setup cutting manual setup time worth **2 days** of work to **2 hours**

Cybersecurity Club IITB May 2020 - May 2021
Manager IIT Bombay

- **Spearheaded** a team of 10 people for planning and organising sessions, talks and **CTF** contests
- Developed and maintaining active wiki and blog site about cybersecurity with **1000s** of daily visitors worldwide
- Organized intra institute two-day **Capture The Flag** competitions with active participation of 250 people

BOSCH May 2019 - July 2019
New Initiatives Lab | Mentor: Gunnar Godara Bangalore

- Developed a retrofit prototype for automatic and optimal gear-shifting mechanism for Deraileur geared bicycles.
- Developed **Smart Shift** mobile application for managing the configuration of embedded system via bluetooth

Capture The Flag Dec 2019 - Present
Cybersecurity competitions Online

- **Project Sekai** | International Team May 2022 - Present
 - Current overall world rank **6** in CTF competitions 2023 by winning **8** CTF competitions
 - Overall world rank **19** in CTF competitions 2022 by winning **15** competitions and in top 10 in **36** CTFs
 - Created cryptography challenges in **SekaiCTF 2022** with a worldwide participation of over **850** teams
- **Team Zh3r0** | Indian Team September 2020 - Present
 - Finished with ranks **3, 4 and 3** in India in consecutive years 2020-2022 in India
 - Created cryptography challenges in **Zh3r0 CTF V2** with a worldwide participation of over **500** teams

Awards & Achievements

- **Gold** Medal in 9th International Olympiad in Cryptography NSUCRYPTO with **highest score** (2022)
- **Gold** Medal in 8th International Olympiad in Cryptography NSUCRYPTO with **highest score** (2021)
- **Gold** Medal in 7th International Olympiad in Cryptography NSUCRYPTO (2020)
- Bagged **2nd** position in HCL HACK IITK 2021 Cybersecurity Hackathon (2022)
- Secured **Gold** medal in Saptang Netsec Challenge 9th Inter IIT Tech Meet (2021)
- Secured **2nd** position in Capture The Flag competition in 8th Inter IIT Tech Meet (2019)
- Secured All India Rank **59** in **JEE Advanced** among 200,000 students in India (2017)
- Secured All India Rank **368** in **JEE Main** among 1.2 million students across India (2017)
- Secured All India Rank **194** in Kishore Vaigyanik Protsahan Yojana (2017)
- Amongst **350** students selected for INPhO and amongst national **top 1** percentile in NSEP (2016)
- Amongst **350** students selected for INChO and amongst national **top 1** percentile in NSEC (2016)

Research Experience

RNGesus

Spring 2021

Guide: Prof. Bernard Menezes

Course Project, IITB

- Implemented new approaches for state and seed recovery of commonly used Pseudo Random Number Generators - Mersenne Twisters, LFSRs and Truncated Linear Congruential Generators using SMT modelling
- Analyzed flaws in seed initialization phase of most commonly used general purpose PRNGs - Mersenne Twisters to recover 19937 bit state and initial seed using 32 bits of output on a single core machine under 5 minutes
- Developed new approaches for state recovery of truncated LCGs for state recovery in $GF(2^n)$ where lattice reduction approaches fail due to non existence of modular inverses using far less outputs with no false positive solutions

Automated Cryptanalysis

2021 - Present

Guide: Prof. Bernard Menezes

Research Project, IITB

- Implemented state of the art library for automated linear and differential cryptanalysis for SPN ciphers
- Successfully cracked variants of ciphers as big as 128 bit and as deep as 10 rounds in **10 minutes**

Controller Synthesis

Spring 2021

Guide: Prof. Ashutosh Gupta

RnD Project, IITB

- Synthesising verifiable controller for a real-time system based on data-driven RL approaches and algorithmic SAT-SMT approaches to control a railway network modelled as timed-automata constraints over a set of specifications
- Utilized tools like DCvalid and UPPAAL to design and model networks of timed automata and verify solutions
- Studied approaches for determinization and minimization of timed automata specification given in duration calculus

ANF allSAT solver

Spring 2021

Guide: Prof. VR Sule

Course Project, IITB

- Implemented parallel all-SAT solver for finding all satisfying solutions of a sparse multivariate boolean polynomial
- Developed a parallel implementation of solver in SageMath solving for a complete set of orthogonal implicants of boolean functions appearing as factors of the boolean formula represented in Algebraic Normal Form

Projects

Pyfractal | Self Project

Summer 2020

- Developed an easy to use, fully documented **Python Library** for generating brainfilling fractal curves
- Integrated intuitive **GUI** using **Tkinter** enabling understanding of fractals without mathematical background
- Packaged ready to use, **open-sourced**, multi-platform binaries for out-of-the-box working software

Malware Detector-Classifer | Self Project

Summer 2020

- **Developed** a malware detector cum classifier based on static analysis of program ensuring **zero risk** to host
- Processed **50GB** of malware and benign files to train high accuracy and f-score ML model for certain classification
- Engineered high importance features based on practical malware analysis for **low overhead** of computation

P2P BotNet Detector | Self Project

Summer 2020

- Developed a network analysis tool for detection of **Peer-to-Peer** botnet infected hosts and traffic in network
- Analysed **47 Million** botnet and benign packets for anomaly based machine learning model used in detection
- Deduced network flows for transmission of botnet malware and further communications between infected hosts

Secure Personal Cloud | Course Project

Autumn 2018

- Developed a web application and a command line linux client for a cloud based file system for multiple users
- Implemented full **client-side** encryption for web client using **SJCL** and linux client using **pyCryptodome**
- Implemented support for multiple simultaneous clients with automatic sync of files between client and server

SAT-Solver | Course Project

Spring 2018

- Implemented **SAT** solver based on **DPLL** algorithm in functional programming paradigm in Racket
- Implemented recursive literal assignment and backtracing for finding satisfying assignment of formula in CNF

OSPF Protocol for Routers | Course Project

Spring 2019

- Implemented Open Shortest Path First protocol in **VHDL** for building forwarding tables on routers
- Modified the standard OSPF protocol and packets to increase the efficiency of data transfer and processing

Art Generation with GAN | Course Project

Autumn 2019

- Implemented Deep Convolutional Generative Adversarial Networks to generate art from art datasets
- Image dataset collected by scraping Google image art datasets and converted to 64X64 using bilinear interpolation

Shell File Server Client | Course Project

Spring 2019

- Developed a shell-based file server using **Socket programming** capable of handling multiple concurrent clients
- Implemented user authentication and multiple sockets for a user enabling simultaneous parallel downloads

Regular Expression Parser | Course Project

Spring 2018

- Implemented basic level string matcher Linux-CLI utility **egrep** using functional programming in **Racket**

Blogs

- **Personal Blog** - Covering my technical interests and wanderings and problems created by me
- **CTF Competition Writeups** - Containg all the writeups I created for CTF challenges in years 2020-2022
- **Cybersecurity Club IITB wiki** - Covering wiki pages for learning cybersecurity

Talks

- **6th Indian SAT+SMT Winter School** - RNGesus - State and seed recovery for RNGs using SMT solvers

Extracurriculars

- Amongst top **20** players at **cryptohack.org** completing **all** challenges and ranked **1st** in India (2022)
- Prepared challenges for upcoming module on Post Quantum Cryptography for **Cryptohack.org** (2022)
- Won **best writeup** award for crypto challenge Pythia in Google CTF 2021 (2021)
- Community moderator, contributor and amongst top **50** players at **cryptohack.org** (2020)
- Participation in **40+** international Capture The Flag events in 2020 and **25+** in 2021 (2020)
- Secured **First** position in Intra Department Badminton Tournament (Mens' Doubles) (2018)
- Secured **Third** position in XLR8, Remote Controlled bot making competition at IITB freshmen year (2017)
- Secured **Third** position in Potpurri Competition in Freshiezza, a college freshman competition (2017)
