MIXES SHOWN

24

Choose a piece mix from the list. Its name tells you how many of each shape it uses.

O4 means four O pieces. **I2-J2** means two I pieces and two J pieces.

The number drawn on each block is its build step. Blocks with the same number belong to the same piece.

A piece mix may fit together in several ways. The large diagram shows one of them.

Building a square adds no points immediately. Clear its rows to collect the total value.

Earlier row shares remain after a larger square forms, but a Spin Move can destroy uncollected value.

GOLD SQUARE / ONE TYPE

T4

TOTAL VALUE FOR THIS EXAMPLE

3,500

Base value	1,000	Gold bonus	+1,500
Extra piece types	+0	Shape bonus	+1,000

Building this square adds 0 points. Clear a row to collect its 875-point share. All 4 shares add up to exactly 3,500.

The same pieces can fit together in other ways. This total is only for the example shown here. The shape bonus grows when fewer straight gaps can separate the pieces.
