

Challenge archive: SekaiCTF 2022 - FailProof Revenge

deuterium — Event date: 2022-09-30

Challenge event began 2022-09-30; article publication date not recorded.

Canonical HTML: <https://deut-erium.github.io/challenges/sekaictf-2022/failproof-revenge/>

Abstract

SekaiCTF 2022 - Cryptography.

By deuterium.

Original description

| I am sure it's failproof now, I have increased the security levels too!

Read this challenge as plain text or JSON.

Files

- source.py (archived server source).
- Fixed instance (output.txt).

The flag module is needed only to generate a new instance. Solve from the source and the two lines in output.txt; no server is needed.

This fixed output was generated for the post with the unchanged original program and event flag. It is not a recording from the competition.
